GOLDEN

Providing Equipment. Prioritizing You.

GivingHME, a sister company to Giving Home Health Care, was established in mid-2024. We have a clear mission: to provide the highest quality home and durable medical equipment (HME/DME) to individuals affected by conditions contracted while working in Department of Energy nuclear programs.

As a trusted and enrolled provider under the EEOICPA, we recognize that DME/HME are more than just products — they are an essential part of your daily life and well-being. That's why we are committed to delivering top-tier equipment along with the confidence, education, and support that our patients and their families need — providing compassionate service grounded in a deep understanding of your unique healthcare challenges.

About the Program

The Energy Employees Occupational Illness Compensation Program Act (EEOICPA) was enacted in 2000 to address the health risks faced by employees working for the Department of Energy (DOE) or its contractors or subcontractors who were involved in nuclear weapons production and other energy-related activities during the Cold War and beyond.

Many workers were exposed to hazardous materials, including radiation and toxic chemicals, without sufficient safety measures. This exposure led to serious health issues, prompting the need to provide compensation and medical benefits to support these workers and their families.

Eligible workers can receive a maximum lump sum benefit of \$400,000 for work-related illnesses, along with a vast variety of healthcare expenses covered for life.

Equipment Delivery in 4 Easy Steps

- 1 SPEAK TO YOUR COORDINATOR**
- 2 UNDERSTAND REQUIREMENTS**
- 3 COMPLETE AUTHORIZATION**
- 4 SCHEDULE DELIVERY**

1. Ready to get started? Reach out to your Giving Home patient coordinator! We will explain the process to you and discuss the details of your next steps.

2. Once our team confirms your eligibility, we work directly with your physician to complete the prescriptions, paperwork, or testing that may be required to receive your HME with Department of Labor (DOL) program reimbursement. We will discuss with you what is required up front, leaving no surprises down the road.

Delays are always possible when awaiting paperwork to be completed by your physician. GivingHME strongly recommends advocating for yourself to your physician.

We strive to ensure you receive all the services and resources available through your EEOICPA White Card. Don't leave benefits unclaimed — we'll help you access everything you're entitled to.

3. Prior authorization may be required before equipment delivery to ensure you do not end up having to cover any cost. It may take up to 8 weeks to receive a response from the DOL; however, we will be in touch the entire time.

Certain categories of equipment may take longer to approve. We always recommend calling GivingHME or the DOL whenever you have a question or wish to receive an immediate update.

4. Once authorization is received, we will immediately call to schedule your delivery! Our experienced, compassionate technicians will deliver, set up, and educate you on your equipment at the time of your choosing.

THE EEOICPA PRIMARILY ASSISTS:

- Former Employees of the DOE:** Those who worked in nuclear weapons production facilities, uranium mines, and related sites.
- Contractors and Subcontractors:** Employees of companies contracted by the DOE are also eligible.
- Survivors of Deceased Workers:** Family members can apply for benefits if the original worker has passed away.

Advice from a Respiratory Therapist

GivingHME offers around-the-clock service response that supports patients with respiratory equipment. Our trained and registered respiratory therapists are on call 24/7 to troubleshoot any equipment issues or malfunctions, and they are licensed in multiple states to ensure all our patients are guaranteed the best care.

Did You Know?

To get the most out of your respiratory equipment, **always follow manufacturer guidelines** for cleaning and replacement.

GivingHME ensures timely resupply of oxygen concentrators, CPAP/BIPAP/APAP devices, and related medical supplies, **helping you maintain your respiratory equipment and receive optimal therapy.**

Trusted Education. Quality Equipment.

STAYING AHEAD OF THE CURVE

We use the latest AI technology from SleepGlad to scan your face and analyze your sleep style to choose the most appropriate mask for your sleep device. This will reduce the hassle of multiple mask refittings and guide you to restful sleep with your sleep device.

TRAVELING WITH YOUR EQUIPMENT

At GivingHME, we believe equipment should work with your lifestyle, not the other way around. We provide one of the lightest and most portable oxygen systems/CPAP devices available on the market, along with extended batteries for carefree travel.

NAVIGATING COLD AND FLU SEASON

GivingHME provides a Lumin PAP cleaning device that utilizes UV-C light sanitation for your frequent cleaning needs during flu and cold season. This cleaning device is best for destroying fungi, bacteria, and viruses. Always remember the foundation of your cleaning regimen for your PAP supplies starts with washing with soap and water on a weekly basis.

CONVENIENT ON-STAFF RESPIRATORY THERAPISTS

GivingHME has registered respiratory therapists on staff who can coach you in use of respiratory therapy devices such as your Acapella and incentive spirometer. Proper technique and use of your aerosol nebulizers, incentive spirometers, and Acapella devices are essential to your lung health.

Respiratory Health

We understand that managing respiratory health is a daily priority for many of our patients. That's why we offer a wide range of high-quality respiratory equipment and collaborate closely with your healthcare providers to select the best solutions for your needs. Our licensed respiratory therapists, available 24/7 through our service response line, are trained to troubleshoot equipment issues and ensure you receive the best care no matter where you are.

Elliptical Machine

UNDERSTANDING PRIOR AUTHORIZATION

If a product shown in this guide is marked with this check symbol, prior authorization is likely required. **Visit page 7 to learn more.**

SUPPORTING SAFE MOVEMENT AND REHABILITATION

• Stationary and Folding Treadmills:

Treadmills provide a simple and effective way to stay active indoors. We offer high-quality stationary models to fit your space and routine. These machines support cardiovascular health, endurance, and mobility goals, and are ideal for patients cleared for weight-bearing exercise. Our team can help determine the best fit based on your care plan and home environment.

• Low-Impact Cardiovascular Equipment:

For those needing gentler options, we offer rowing machines, recumbent bikes, and ellipticals to provide heart-healthy exercise without added strain on joints. These machines support safe movement and can be integrated into rehab programs or daily wellness routines. Each is chosen with comfort, accessibility, and ease of use in mind.

Did You Know?

Exercise equipment **may take longer to authorize through the Department of Labor** and must include strong justification linking its use to covered conditions.

Our HME experts are here to help guide you through this process.

Electrolyte Supplements

SUPPORTING YOUR NUTRITION AND WELLNESS

• Medical Nutrition Supplements:

Our range of nutritional supplements help you meet your dietary needs. These supplements can be tailored to address specific nutritional deficiencies, from high-calorie shakes to vitamin-enriched formulas.

• Feeding Equipment and Accessories:

For those who require assistance with feeding, we offer specialized equipment including adaptive utensils, feeding tubes, and accessories that make mealtime easier and more comfortable. These tools support safe and effective nutrition, ensuring you receive the sustenance you need.

Diabetic Supplies

Managing diabetes effectively starts with having the right tools at your fingertips. From glucose monitoring to protective pain relief, our range of diabetic supplies can help support your unique care plan. We work closely with you and your care team to help you stay on track, feel confident, and maintain control over your health every day.

Diabetic Ulcer Socks

Knee-High Men's Compression Socks (20-30mmHg)

Waist-High Compression Pantyhose (20-30mmHg)

SUPPORTING YOUR DIABETES MANAGEMENT

• **Oxygen Therapy Equipment:** We offer a variety of continuous glucose meters and testing supplies to help you stay on top of your blood sugar levels. These important tools support daily tracking and long-term health management, and can be tailored to your specific care plan.

• **Diabetic Foot Care and Accessories:** Foot health is vital for individuals living with diabetes. We provide specialized shoes, compression socks and hose, orthotic inserts, and wound care products that promote circulation and help prevent complications.

UNDERSTANDING PRIOR AUTHORIZATION

If a product shown in this guide is marked with this check symbol, prior authorization is likely required. **Visit page 7 to learn more.**

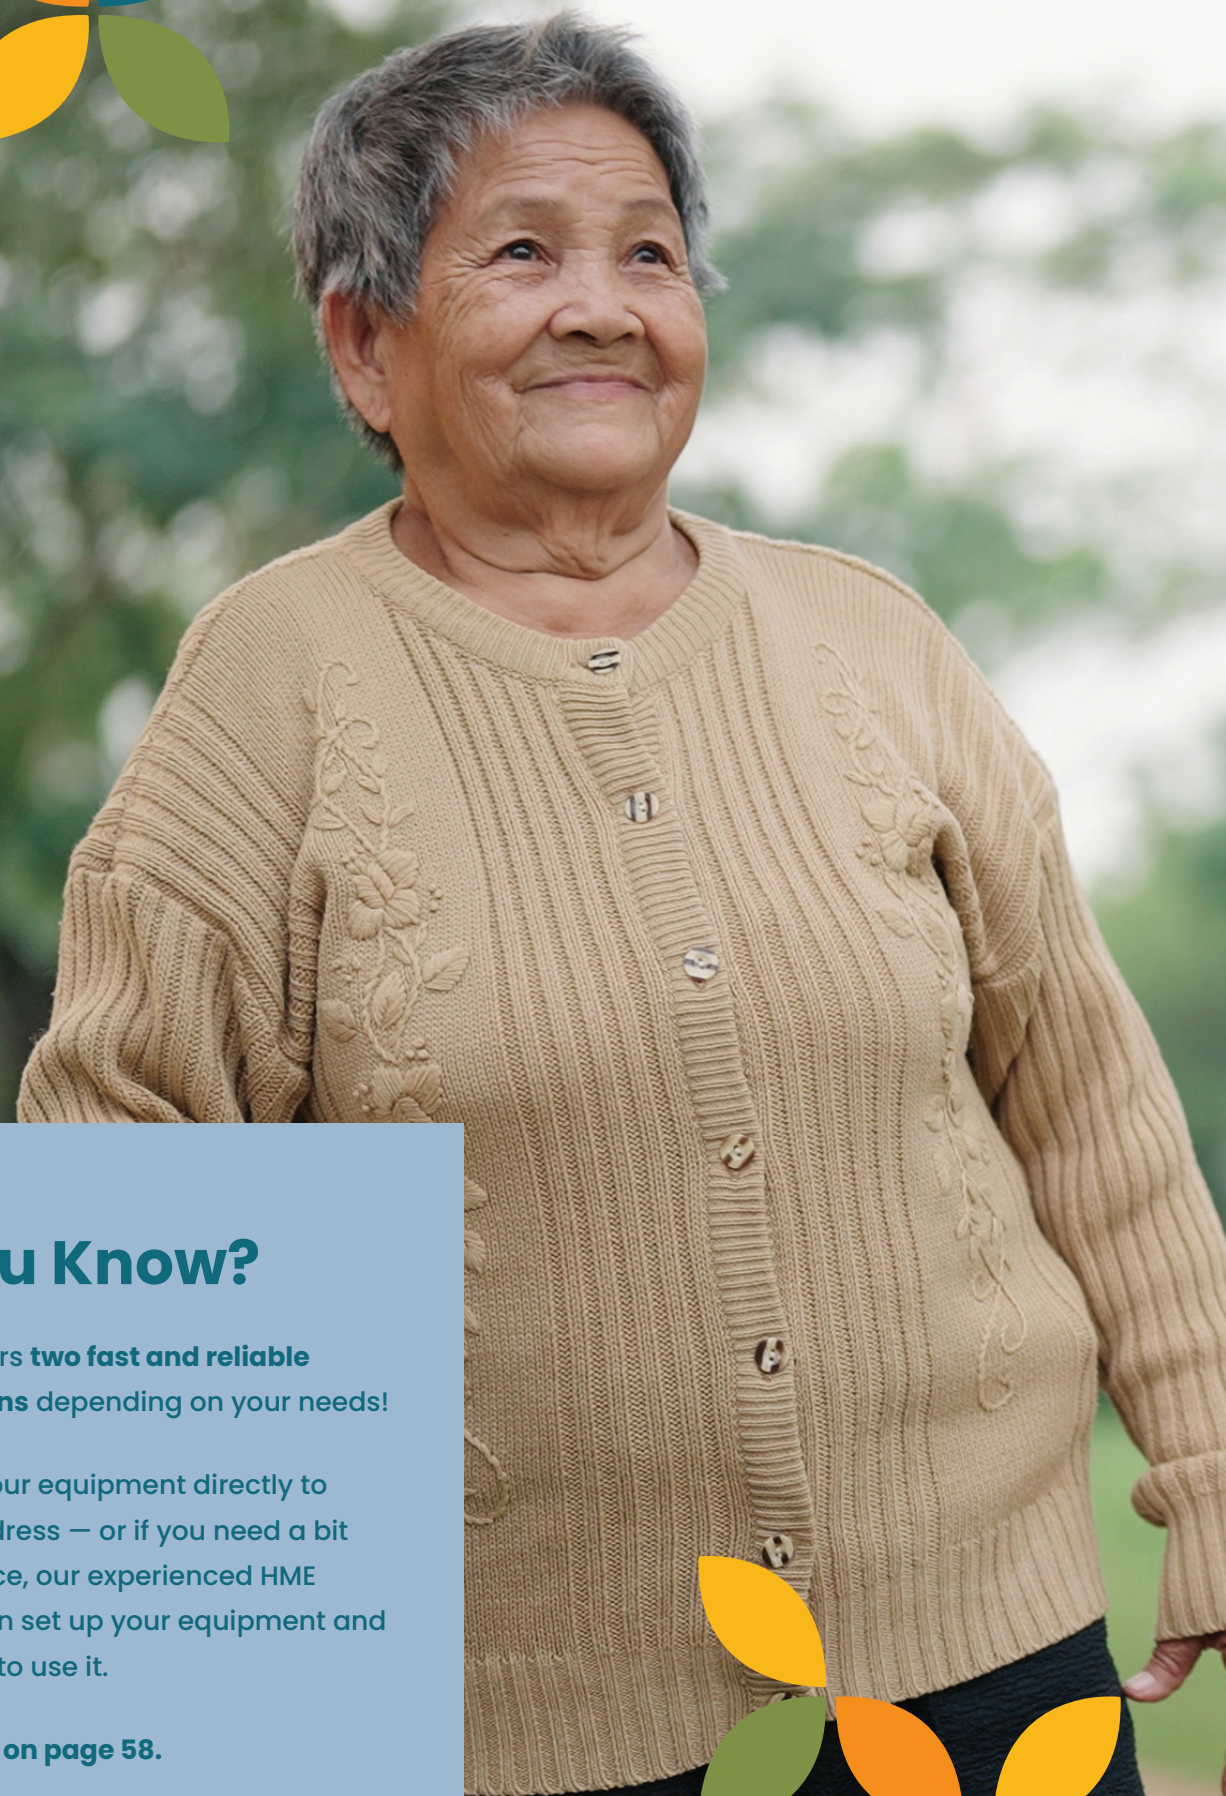

Did You Know?

Home medical equipment prescribed to you for a covered condition **is eligible to be included in your White Card benefits.** The EEOICPA may cover the cost of your equipment if your physician prescribes it because of a DOL-covered condition.

GivingHME is here to advocate for you through this process and deliver high-quality equipment directly to you in your home.

Providing Equipment. Prioritizing You.

Daily Living Support and Medical Supplies

We are dedicated to helping make your daily life more manageable and independent. Our carefully selected range of adaptive equipment and products can fit seamlessly into your care plan, helping support your activities of daily living (ADLs) and empowering you to thrive.

Did You Know?

GivingHME offers **two fast and reliable shipping options** depending on your needs!

We can ship your equipment directly to your home address — or if you need a bit more assistance, our experienced HME technicians can set up your equipment and show you how to use it.
